KKP | 环保之路 Our way to environmental protection

保护地球，为后代保留一个可持续发展的环境，简称“环保”，不应只是口号，而是每个国家、每个企业、每个人必须共同承担并全力去实现的目标。但环保是一个很广义的概念，不同人不同行业会有不同理解。在塑胶行业的实践上有很多不同的方法(例如，回收重用，物料改性，再生原料)，去达至不同程度的贡献(例如，自然降解，减少塑料废物，减碳排放，减少依赖石油资源)。

Protecting the earth and preserving a sustainable environment for our future generations (short for "environmental protection") should not be just a slogan. It must be a goal that each country, each enterprise and each person should undertake and spare no effort to achieve it. However, environmental protection is a broad concept. Different person and industry may have very different interpretation. In the plastic industry, there are many different methods (such as, recycling and reuse, modified material, renewable raw material) to achieve different levels of contribution (such as, self-degradation, reducing plastic waste, carbon emission and dependence on petroleum resources).

作为一家具有社会责任的企业，KKP自2010年起一直致力于环保方面的资源投入，探索原料，调试工艺，验证产品，旨在主动地连接供应链上下游企业，共同为环境保护做出贡献。通过对各类环保材料的持续验证，包括PLA，生物基PE，PCR-HDPE，PCR-PET和石油基可降解材料等，KKP把累积的经验整合出一套可实践的环保方案。

环保策略，不仅可以符合目标市场的法规，还可以提升企业/品牌形象，突显差异化去提升竞争力，成为行业的先行者等。KKP能因应客户的环保目标，产品及市场特性，成本考虑，外观要求，内容物的兼容性，性能的保质期等，去协助客户选择合适的环保方案。

As a socially responsible enterprise, KKP has been investing resources in environmental protection since 2010, exploring material, adjusting process and verifying product, with the purpose of proactively aligning upstream and downstream enterprises along the supply chain to cooperatively making contribution to environmental protection. Through continuous verification of various environmental-friendly materials, including PLA, bio-based PE, PCR-HDPE, PCR-PET and petroleum-based degradable materials, KKP consolidates lesson learned and integrates a set of practical environmental protection solutions.

Environmental protection strategy not only can comply with the laws and regulations of the target market, but also improve the corporate/brand image, reinforce differentiation to raise competitiveness and become the pioneer in the industry. KKP can assist customers in selecting the right environmental protection solution according to their environmental goals, product and market characteristics, cost considerations, appearance requirements, compatibility of contents, and performance lifespan.
